Example 2 -- Color Victory

	Red	Blue	Total Pts.
Player A	5	6	47
Player B	3	2	51

Even though Player B has more points, Player A has more red cards and more blue cards, so Player A automatically wins.

SAME COLORS: If both of the revealed cards have the same color, the game will be determined by points. However, having more cards of the selected color is worth a bonus of 15 points at the end of the game.

BLACK AND SILVER: If only one revealed card has a basic-color border (and the other is black or silver), the game will be determined by points. However, having more cards of the selected basic color is worth a bonus of 15 points at the end of the game.

If both revealed cards are black-bordered or silver-bordered, the game will be determined by point totals and no bonuses for target colors will be awarded.
